INTRODUCTION

Literature has been widely known by many people and experts. The word ‘literature’ is derived from the word 'littera' in Latin which means letter. It refers to written or printed words. However, now, the term 'literature' is more focused and restricted to merely imaginative works, which comes up from the imaginative mind of the story writerss. Klarer (2004:1) says that in most cases, literature is referred to as the entirety of written expression, with the restriction that not every written document can be categorized as literature in the more exact sense of the word. The definitions, therefore, usually include additional adjectives newspapers, scientific textbooks, magazines, legal documents, brochures, and so on.

Writing is always pictorial, but also the acoustic element, the spoken word is an integral part of literature, for the alphabet translates spoken words into signs. Before writing developed as a system of signs, whether pictographs or alphabets, "texts" were passed on orally. This predecessor of literary expression, called "oral poetry," consisted of texts stored in a bard's or minstrel's memory which could be recited upon demand. This oral component, which runs counter to the modern way of thinking about texts, has been revived in the twentieth century through the medium of radio and other sound carriers. Audio-literature and the lyrics of songs display the acoustic features of literary phenomena. Song lyric is included as a kind of literature because it is language creation (poem) which contains a personal feeling expression. Song lyric is like a poem but it is served in song form.

A song is a melody for a lyric poem or ballad. The lyric which is written by the author has a destination that will be delivered to the audience. The song contains a word system, good diction, and figurative language. So, it will make it not just in their ears, but heart also can feel it. A song is created by author based on their life experience; tell about someone or another. Furthermore, Hornby (1980:822), cited in Wijayanto (2013:17), the song is a short poem or number of verse set to music and intended to be a song.

In addition, a song is a short piece of music with words that you sing (Hornby, 2010:1419). It
means that the producing musical sounds with the voice and augment regular is a speech by the uses of both tonality and rhythm. Songs play an important role in the development of young children learning a second language. Therefore, Songs can help young learners improve their listening skills and pronunciation. They potentially help them to improve their speaking skills. Songs can also be useful tools in the learning of vocabulary, sentence structures, and sentence patterns, not to mention their reflectivity of mother tongue culture.

The greatest benefit to use songs in the classroom is that the students can be fun and songs can add interest to the classroom routine and potentially improve student motivation. In the writers' opinion people are interested in music first; furthermore, they try to understand the lyrics. Although the lyrics of a song are often simple, we shall not take them for granted, otherwise, we will not get the bright sides of it. There is one way to do it that is by analyzing it.

In linguistics, language signs are constituted of four different levels, they are phonology, morphology, syntax, and semantics. Phonology is a branch of linguistics which studies the sound system of language. According to Crystal (2008:314), morphology is the branch of grammar which studies the structure or form of words, primarily through the use of the morpheme construct. It is traditionally distinguished from syntax, which deals with rules governing the combination of words in sentences. The syntax is a traditional term for the study of the rules governing the way words are combined to form sentences in a language (Crystal, 2008:471). Semantics is a branch of linguistics devoted to the study of meaning in language. Moreover, Crystal says that the term is also used in philosophy and logic, but not with the same range of meaning or emphasis as in linguistics. On the other word, semantics is one of the branches of linguistics studying the meaning of language.

Meanwhile, Adisutrisno (2008:1) states semantics is the study of meaning in language. It's a fact that meaning is a part of a language, but this definition has not been clearly delineated and given fair treatment in the study of language until very recently. In traditional linguistics, language is viewed as the vocabulary which is contained in literary works. In the study of language, language definitions are sometimes based on meaning, and sometimes on function. Furthermore, according to Yule (2010:112), semantics is the study of the meaning of words, there is always an attempt to focus on what the words conventionally mean, rather than on what an individual speaker might want them to mean on a particular occasion.

In this study, the writers chose literary works like songs. A song is any poem even there is the attention of it being set to music. It is "Michael Learns to Rock's (MLTR)" Songs. The study limits on lexical meanings and contextual meanings. Moreover, the writers chose "Michael Learns to Rock's" song because their song is very interesting to examine and study in more detail. Besides that, the writers have some reason to be analyzed this study. First of all, this song told about a love story. Then, Michael Learns to Rock's song lyrics contains many clauses. And their songs are also easy to listen. And then, the writers took five songs as a source in an album. The five songs were about a love story that have the same story with the writers in the daily fact. This love story is an introduction for the reader and listener that if we want to make a good relation with our partner, we must know about all of the physical, characteristic, and about inherit of family. Besides that, these songs give lexical meaning and contextual meaning and give a message for.

According to Creswell (2014: 32), qualitative research is a means for exploring and understanding the meaning of individuals or groups ascribe to a social or human problem.
process of research involves emerging questions and procedures, data typically collected in the participant's setting, data analysis inductively building from particulars to general themes, and the researcher making interpretations of the meaning of the data. The final written report has a flexible structure. Furthermore, Creswell (2014:239-240) states the collection procedures in qualitative research involve four basic types and their strengths and limitations; they are qualitative observation, qualitative interviews, qualitative documents, and qualitative audio and visual materials. In qualitative audio and visual materials, this data may take the form of photographs, art objects, videotapes, website main pages, e-mails, text messages, social media text, or any forms of sound.

Therefore, based on the explanations above, the writers conducted a study “A Semantic Analysis of Michael Learns to Rock's (MLTR) Songs”.

METHODOLOGY

In conducting this study, the writer used a descriptive method. According to Ratna (2004), cited in Sopa (2015: 24): "Descriptive analysis method is done by describing the facts then followed by analysis". Meanwhile, Ethridge (2004:24) state descriptive research may be characterized as simply the attempt to determine, describe or identify what is, while analytical research attempts to establish why it is that way or how it came to be. Furthermore, Denscombe (2010:237) explains that qualitative research uses words or visual images as the unit of analysis.

According to Kothari (2004:2-3), descriptive research includes surveys and fact-finding inquiries of different kinds. The major purpose of descriptive research is a description of the state of affairs as it exists at present. The main characteristic of this method is that the researcher has no control over the variables; he can only report what has happened or what is happening.

Furthermore, Kothari (2004:7-8) states research methods may be understood as all those methods/techniques that are used for conduction of research, such as analysis of historical records (recording of notes, content analysis, tape and film listening, and analysis) and analysis of documents (statistical compilations and manipulations, reference and abstract guides, contents analysis). Research methods or techniques, thus, refer to the methods the researchers use in performing research operations. In other words, all those methods which are used by the researcher during the course of studying his research problem are termed as research methods.

3. Analysis of That’s Why (You Go Away) Lyrics

This song tells about the dishonesty of a girl to her lover. It tells the story of a man who loves his girlfriend very much. But the girl wanted to part with him for no apparent reason. Actually the man did not want it to happen. There are so many the girl’s promises and sweet memories he could not forget. Finally, they must be separated because he is not a man loved by the girl. There isn’t a way to make the condition be better and defend the relationship. As in the analysis below:

S₁, L₄

Baby, won’t you tell me why there is sadness in your eyes
I don’t wanna say goodbye to you
Love is one big illusion I should try to forget
But there is something left in my head

The first stanza has meaning "a man who must be forced to forget love to his girlfriend although he still loves and remembers sweet memories because, in fact, he does not want to leave her"

S₂, L₃

You’re the one who said it up, now you’re the one to make it stop
I’m the one who’s feeling lost right now
Now you want me to forget every little thing you said
but there is something left in my head

The word “You” above refers to the singer's girlfriend. The singer expressed his disappointment to her lover because his girlfriend breaks a promise on all the promises and words that had been spoken once when they were still lovers. But he still cannot forget it. In other words, in this verse, the man says “You are the one who promises and you are the one who denies”.

S₃, L₃

I won’t forget the way you’re kissing
The feeling’s so strong were lasing for so long
But I’m not the man your hearth is missing
That’s why you go away I know

At this stanza, the man reveals the reason why his girlfriend left him. “The reason why the girl left her boyfriend because he is not the man she loves”. We can know this reason from the third line.

S₄

You were never satisfied no matter how I tried
Now you wanna say good bye to me
Love is one big illusion I should try to forget
But there is something left in my head

The fourth stanza means “the girl was never satisfied with all the sacrifices done by her boyfriend, so she wants to leave her lover even though her boyfriend didn’t want to leave her”.

S₅, L₂

Sitting here all alone in the middle of nowhere
Don’t know which way to go
There ain’t so much to say now between us
There ain't so much for you
There ain't so much for me anymore

The last stanza singer tells us “in his despair and solitude, the man had no purpose. He wondered where he should go to solve his problems. He didn’t know what else he wanted to do to keep his love. Because no matter how hard the effort he has tried to maintain their relationship, eventually their relationship ends because there is nothing else to fight for”.

But the man had chosen the way to become a soldier, he had an obligation to obey the commands and do the duties. One of them was to fight for independence. The man hopes that he and his lover can get rid of each other's selfishness, so they can keep loyalty and honesty for each other, no lies because of the great distance. Behind the sadness of his going to war, there is little happiness in his hearth. Because, after his departure, there are still many people who care, affection and attention to his lover are so she is not alone. He is happy even though he is in the opposite condition when he has to go to war. As in the analysis below:

\[
S_1, L_2
\]

\[
\text{Nothing can stop emotions that run down the sides of your face}
\]
\[
\text{Wish I could change this moment to another time and place}
\]

The singer tells “the expression of sadness and disappointment seen on his girlfriend’s face when she knew the reality and she hopes her boyfriend can change his mind”.

\[
S_2, L_2
\]

\[
\text{Nothing you say can move me}
\]
\[
\text{I've chosen the road that I'm on}
\]
\[
\text{I have to join the fight for freedom until the war is won}
\]

This verse tells of the man’s determination to keep going on to war. Because as a soldier, the state is number one. Although the girl wished her boyfriend would not leave to join the war of independence but her effort wasted because nothing else can change the boyfriend’s decision. He had the determination to join the fight to win it”.

\[
S_3, L_4
\]

\[
\text{We will keep the faith between us}
\]
\[
\text{If we only try}
\]
\[
\text{We will keep the truth inside us}
\]
\[
\text{Love will never lie}
\]

The third stanza has meaning "the man hopes that he and his lover can get rid of each other's selfishness. So they both will always try to keep each other's trust, loyalty, and love even though they have a long distance relationship. Although they are not always together, separated space and time, if they love each other there will be no lie between them".

\[
S_4, L_3
\]

\[
\text{Someone will always hear you}
\]
\[
\text{Care about you when you cry}
\]
\[
\text{But no one can hear my heart is breaking as I say goodbye}
\]
In this verse tells about the man is trying to convince the girlfriend that after he leaves she will not be alone and there are still many people around her who care about her. But, the different feelings he felt when he had to go to war. No one knows about his sad feelings. As a soldier he will remain tough and strong against this condition. He can cover up his sad feelings from his girlfriend and others around him.

5. Analysis of 25 Minutes Lyrics

This song tells us about the singer's regret for leaving her lover. He regrets after realizing that the girl is the best for him and wants her to be his girlfriend again. After searching all places he still did not find her. But there is one place he doesn't go, it's the church. One day he found the girl in the church, precisely in front of the church. The girl is wearing a beautiful wedding dress and looks so happy. She just finished her marriage with another man. In fact the girl also still loved him but it was too late. She's been the wife of someone else, twenty-five minutes ago. As in the analysis below:

\[ S_1, L_2, L_5 \]

After some times I've finally made up my mind
She is the girl and I really want to make her mine
I'm searching everywhere to find her again
To tell her I love her
And I'm sorry 'bout the things I've done

The first stanza contains “regret of a man after he realizes his mistake for having left his girlfriend, whereas the girl is the best for him. He searched for the girl everywhere to apologize and asked her to be his lover again”.

\[ S_2 \]

I find her standing in front of the church
The only place in town where I didn’t search
She looks so happy in her wedding dress
But she’s crying while she’s saying this

Through these lyrics, the man told if he found the girl in unexpected place, it was the church and the girl looks so happy because she has held her marriage. But there is her sadness because of the encounter”.

\[ S_3 \]

CHORUS
Boy I missed your kisses all the time but this is
Twenty- five minutes too late
Though you travelled so far boy I’m sorry you are
Twenty- five minutes too late

In fact, the girl still loves the man. Because the man went away for a long time and there was no certainty so he decided to marry another man. When he meets his ex-lover, the marriage was done twenty-five minutes ago”.

\[ S_4 \]

Against the wind I'm going home again
Wishing me back to the time when we were more than
Friends

From the lyrics above, we know that the singer is very desperate. He is very sad. He didn’t expect the marriage of his former lover. In this condition, the man still hopes that he can be her boyfriend again.

\[ S_5 \]

But still I see her in front of the church
The only place in town where I didn’t search
She looked so happy in her wedding dress
But she’s cried while she was saying this
The singer tells us that he still remembers when he accidentally met the girl in front of the church. She wore a wedding dress and looked so happy. The man also remembers when the girl cried and said that she was too late. He still remembers all those memories.

\[
\begin{align*}
S_6, L_2 \text{ and } L_4 \\
\text{Out in the streets} \\
\text{Places where hungry hearts have nothing to eat} \\
\text{Inside my head} \\
\text{Still I can hear the words she said} \\
\text{I can still her say}
\end{align*}
\]

The lyrics describe how deep the sadness when he loses his beloved girlfriend. The man was very disappointed and desperate to know what had happened. He never thought his ex-lover would marry someone else. Everything that happens is beyond the expectations. He walked aimlessly. He felt his life was empty.
